Therefore, in an effort to ensure a healthful, safe, and pleasant environment for all of our patrons, students, and employees, while recognizing the rights of both smokers and non-smokers, the college has implemented the following policy:

Each college is designated as non-smoking except for designated smoking areas which are identified by "smoking permitted" signs. More specifically, areas where smoking is prohibited included but are not limited to:

Students who choose to smoke on school grounds should do their part to keep the grounds and parking lot clean and neat by properly disposing of cigarette butts in trash containers and by picking up any cigarette butts that are left on the grounds by others. Failure to comply with this procedure may result in disciplinary action from the school.

## **COUNSELING RESOURCES AND PROCEDURE**

For job leads and job hunting strategies, please see the president's office. Although we cannot guarantee placement as an incentive for a student to enroll, Jenks Beauty College offers placement assistance to its students. We post notices for area salons looking for qualified stylists and technicians, and we will work toward placing graduates in the salon they prefer. Salon owners and managers are regularly scheduled to make presentations to our students, to demonstrate skills and speak about their salon's career opportunities upon graduation.

For counseling resources, please report to the director of education or the president's office. There is a student resource board which lists public health, charity, and mental health resources located in a public area.

## **EMERGENCY RESPONSE AND EVACUATION PROCEDURES**

### **FOR ALL EMERGENCIES CALL 911**

A fire emergency evacuation is initiated when a fire incident occurs.

The objective: all building occupants are safely evacuated to a safe distance and location from the building affected, away from fire hydrants, fire lanes, and not under power lines.

Fire evacuation procedures:

- Evacuation is mandatory when a fire alarm is activated.
- Designated staff or faculty check the affected building(s) to ensure all personnel are appropriately evacuating.
- Assist people with disabilities if possible.
- Ensure all doors and windows are closed as a room and building are evacuated.
- Do not attempt to reenter the facility unless and until directed to do so by authorized personnel.
- Evacuated persons are directed to a safe distance and location from the building affected, away from fire hydrants, fire lanes, and not under power lines.

The National Fire Protection Association recommends that you should only stand and fight a fire if all of the following are true:

- Everyone is leaving the premises and fire department has been called
- The fire is small and confined to the work area where it started (wastebasket, cushion, small appliance, etc.)
- You can fight the fire with your back to an escape route.
- Your extinguisher is rated for the type of fire you are fighting and is in good working order.
- You know how to operate the extinguisher.

## **LOCATION AND USE OF FIRE EXTINGUISHERS**

Fire Extinguishers are located throughout the school usually near an escape route.

Follow the instructions on the Fire Extinguishers

- Pull the pin
- Aim the Nozzle
- Squeeze the Handle
- Sweep from side to side at base until fire goes out.

## **EMERGENCY EVACUATION FOR BOMB THREAT OR OTHER NON-FIRE SITUATION**

Non-fire emergency evacuation is used for any emergency evacuation not related to a fire incident. It is important to remember that evacuation distances significantly expand, up to hundreds of yards, for suspicious object evacuations. Nevertheless, not all bomb threats will necessarily result in evacuation, depending upon the individual event circumstances.

The objective: move all campus occupants to a remote, and controlled location.

Other Evacuation Procedures:

Staff will assess the situation and direct students accordingly.

## **EMERGENCY LOCKDOWN**

Emergency Lockdown is used to dramatically and rapidly enhance the level of security in the facility. By locking all exterior, interior and class doors, staff can make it more difficult for dangerous person(s) in the vicinity or in the facility to gain access to staff and students.

Note – locking doors should not eliminate immediate egress possibilities from the facility

The objective: create as many physical layers of separation between you and the potential aggression.

Emergency Lockdown Procedures:

1. Make sure entrance points to the building near your location are locked immediately.
2. If you are located in an area with a door that can be locked, gather all students and clients in the vicinity into the room and lock the door.
3. Improvise additional door blocking if possible.
4. Close blinds and cover additional windows, e.g., with a shirt, up-turned table, paper, etc.
5. Turn off lights in the room.
6. If possible, report your status to the lead administrator or designee by telephone or intercom.

7. Do not open the door for people claiming to be public safety personnel unless you have an opportunity to view photo identification or are instructed to do so by a staff member whom you recognize.

### **Shelter in Place**

Sheltering in place procedures are traditionally utilized when:

1. A tornado has been spotted.
2. There has been a chemical or biological incident outside of, but in proximity to, a facility and available information indicates that there is no adequate time to evacuate building occupants to another safe location before the dangerous contaminants reach the facility.

Objective: seek immediate shelter away from doors and windows and remain there during an emergency.

### **Staff Response**

1. All staff that is outdoors should quickly gather all students and adults in the area and instruct them to go inside the facility immediately. Once inside, if possible instruct everyone to move to an interior area without windows and doors.
2. Close all windows and doors.
3. In chemical spills / biological incident - if available, use tape to cover all windows and doors with sheets of plastic to help reduce airflow into the area. Wet towels can be used to reduce airflow under doors. Close all outside air vents. Turn off all heating or ventilation systems. Use damp towels or cloths to cover any openings in walls or doors. Tape can also be used to cover any cracks, crevices, electrical outlets, cable television connections or other openings that might allow air to flow into the shelter area.
4. Listen to local radio or television news for instructions from emergency management and public safety officials.
5. Review emergency evacuation protocols
